Aviation Roller Cabinet

F-16

AVIATION

Aviation Roller Cabinet

Introducing the first aviation Roller Cabinet designed specifically to meet the varied needs of F-16 operations. Customizable to meet customer needs, our Aviation Roller Cabinets boast several unique features. A notable few of these features are locking sliding drawers, sliding drawers with a 75kg load capacity which is upgradeable up to 200kg.

Customizable inclined drawers for optimal tool control come standard in addition to sliding drawers. Cabinet comes standard with Internal LED lighting and 230V inlet/outlets provide ideal lighting regardless of exterior lighting conditions. Customizable tool selection and HDFI equipment inserts are upon request.

Right side of the Aviation Roller Cabinet you will find a Side Cabinet. The Aviation Side Cabinet allows technicians to store and operate battery and corded power tools. Storage of power tools, power strip, and charging stations is customizable with our HDFI inserts.

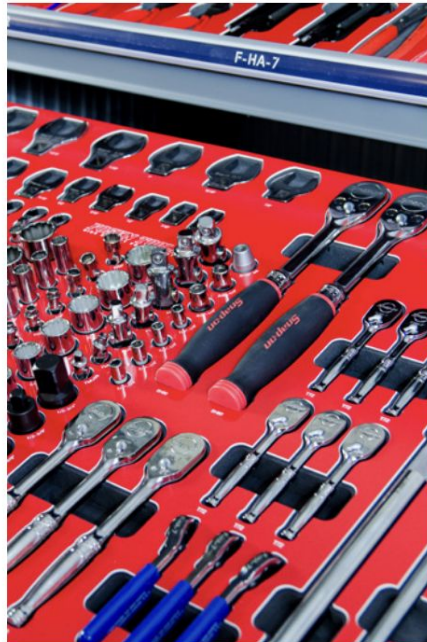

Laser etching for Tool ID, artwork, and patches are available upon request as well as inventory lists of complete batches.

Single sliding door w/lock

For convenient operation and smooth functionality. Single-lock ensures safe storage of your tools and equipment.

FOD control

Tool inserts taken one step further, making FOD control a manageable task. Get systemized with HDFI.

Internal LED-lighting

IP65 rated, long-life LED for illumination of the internal shelves.

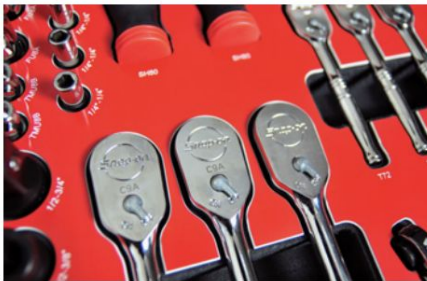

HDFI

Fully customizable tool inserts, based on departmental or task-specific needs.

DEFA 220V power inlet

Discrete and high quality power inlet, for powering internal LED-lighting and optional battery charged equipment.

Engraved labelling

High contrast engraving with tool article numbers, dimensions or other identification marking. Optional laserengraving of tools available.

Oversized casters

High capacity 160x40 mm casters. 2 swivel and brakefitted casters. Non-marking rubber, rolls quietly, protects floors, and resists impact with a cushion ride.

Fully extendable drawers

The differential extension, designed without a crossbeam, ensures perfectly quiet running and allows full extension. The single-drawer blocking system blocks all other drawers when one drawer is pulled out, preventing the cabinet from toppling over.
