Weapon Storage

by Fosen Tools

New Era - weapon control by Fosen Tools:

- Custom fitted to the customers needs.

Fosen Tools introduces a modern weapon storage system. Configurable and scaleable to fit a multitude of different firearms and accessories. Weapon storage solutions from Fosen Tools are produced for ease of use, and designed to be well suited for any size armories within military, law enforcement and correctional facilities. Our solutions can be fitted to both stationary and containerbased configurations.

Based on proven storage systems, available on the market for decades, our solutions are of an uncompromising quality and built to last. The drawer storage system that we utilize is manufactured for Fosen Tools by Lista Ag.

Key characteristics for Weapon Storage by Fosen Tools:

- Rapid visual control
 - Modular design
 - High capacity load
 - Multiple locking options
 - User friendly
- Reduced weapon abrasion
 - Quick and easy access
 - Increased inventory control
 - Products registered with NSN-Codification / Lista Supply no

Example: 16pcs HK 416 fitted in two heights in each vertical drawer.

Colour:
Our standard colour: Grey Metallic NCS S 6502-B.
12 standard colours available. Multi-colour paint also possible.
Customized colours on request.

Features:
Impact- and abrasion-resistant surface with environmentally friendly powder coating.
Total corrosion protection from electrophoretic dip-painting.

VERTICAL DRAWERS
Available in multiple heights and widths for maximum flexibility. 200kg load capacity.

ABRASION REDUCTION
Crossbar with tool grip - for rifle barrels.
Flexible holder that gives each barrel a snug fit. Reduces weapon abrasion.

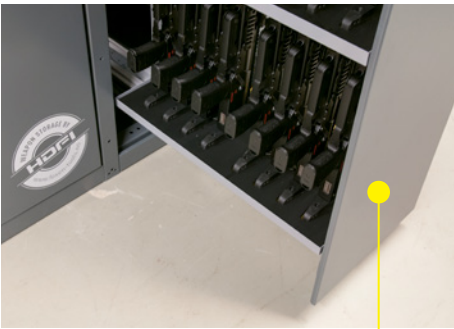

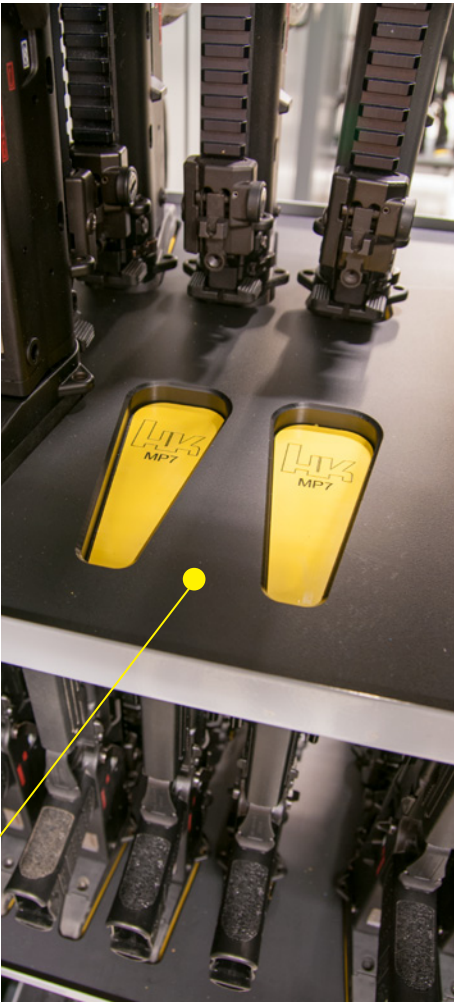

HDFI
High contrast foam inserts with engraved labelling, custom designed for all types of small firearms and accessories.

POLYETHYLENE BASE
Shelves fitted with high quality custom buttstock inserts for a perfect fit. High contrast colors for easy detection of available storage slots.

HIGH CAPACITY DRAWERS
75 & 200kg load capacity. Example: 20pcs GLOCK P80 in each drawer.

VERTICAL DRAWER
Fully extendable pull-out frame construction. Example: 64pcs HK MP7A fitted in four heights in each vertical drawer.

Technical details:

Weapon storage wall with vertical drawers for rifles:

Side frame with perforations 25mm apart on both sides, for insertion of runners or shelf support. Front and rear pillars are welded into a solid frame with horizontal struts. Specification: frame pillars including horizontal braces made of shaped pressed steel sheet.

Fully extendable pull-out frame construction made from angle brackets with vertical perforated strips. 50mm steps. Front sheet with threaded perforated rails for sideways movement or for conversion to double-access storage. Specification: Sheet steel.

Adjustable shelves for double-sided fittings: 150mm up to 350mm. Custom fitted for any type of rifle/weapon. Material: 20mm thickness HDPE 500 black Polyethylene.
* Engraved base: Logo/weapon type in yellow brushed plastic sheet - black text/logo.

Crossbar with tool grip - for rifle barrels. Flexible holder that gives each barrel a snug fit.

- Locking:
- Key lock - standard locking with central locking and cylinder locks.
 - Code lock - Electronic locking system per number code.
 - Master code + up to 19 different user codes.
 - Remote lock - Electronic locking system with hand-held radio control.
 - Can link up to 6 remote locks.

| Vertical drawers | | mm | mm | mm | mm | mm | mm | mm | mm | max weight (kg) |
|-------------------------------|--------|------|------|------|-----|-----|-----|-----|-----|-----------------|
| Sideframes | Height | 2000 | 2200 | 2500 | | | | | | 5000 |
| Sideframes | Depth | 706 | | | | | | | | 5000 |
| Front cover / vertical drawer | Width | 150 | 175 | 200 | 220 | 250 | 300 | 330 | 350 | 200 |

Weapon storage wall with drawers for handguns and weapon accessories:

Side frame with perforations 25mm apart on both sides, for insertion of runners or shelf support. Front and rear pillars are welded into a solid frame with horizontal struts. Specification: frame pillars including horizontal braces made of shaped pressed steel sheet.
