# ABOUT US

HISTORY & OPERATIONS

# HISTORY

**Fosen Tools is part of a family-owned group with a legacy of value creation dating back to 1926.**

Built on three generations of entrepreneurship in construction and building supply, Fosen Tools was established in 2001 with a clear ambition: to introduce a new system standard to the market. Alongside its core solutions, the company also operates as a wholesale supplier, representing a wide range of carefully selected agencies from well known leading international manufacturers.

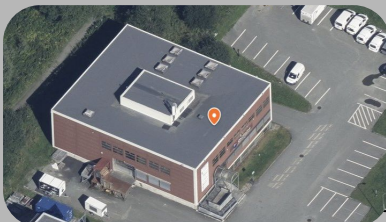

From day one, the company has been driven by innovation and firmly rooted in 5S and Lean maintenance principles. Our mission remains the same — to develop solutions that go beyond organizing tools and equipment, enhancing workflows, quality, control, and overall operational efficiency.

As industries and defense sectors face increasing complexity — along with higher demands for traceability, standardization, and safety — the need for smart, user-adapted systems has grown significantly. In response, Fosen Tools has continuously evolved its expertise and today delivers highly efficient, user-focused solutions covering everything from storage and maintenance to operational readiness. Innovation, quality, and structured systems are at the core of everything we do. With our own development department, modern production facilities, and a global supplier network, we create solutions every day that meet today's needs — and tomorrow's demands.

Today, the fourth generation is actively involved in the company, carrying forward the group's industrial heritage with modern technology, new expertise, and a strong innovation mindset — positioning Fosen Tools for the future.

Serving the defense and aviation industry  
internationally (Oslo and Stavanger)

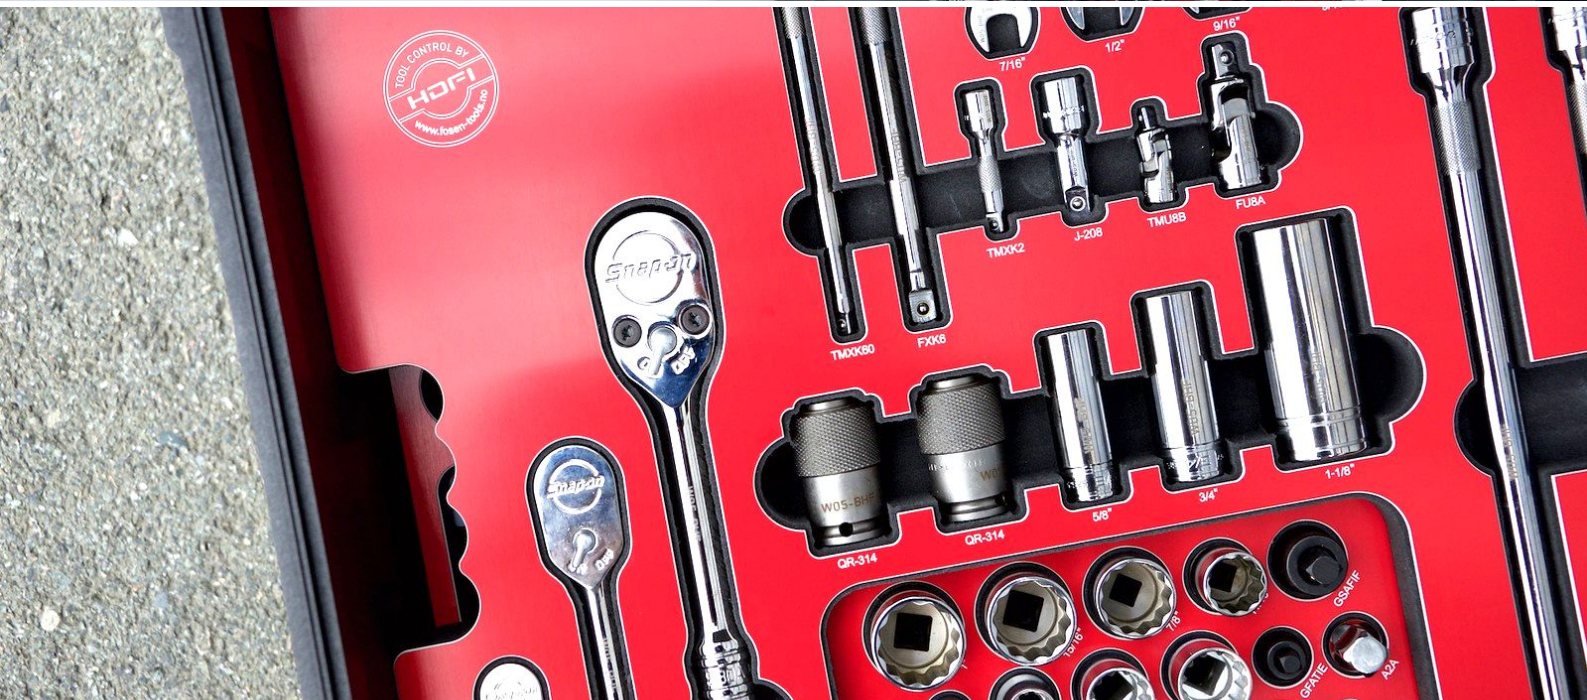

# HDFI

## IN-HOUSE PRODUCTION & TOOL CONTROL

Fosen Tools delivers fully customized tool solutions designed around Lean maintenance principles and the 5S methodology. Our systems don't just organize tools — they protect your investment, extend tool lifespan, and create a more efficient, structured, and high-performing work environment.

Our High Density Foam Inserts (HDFI) are engineered using non-absorbent foam combined with a durable dual-layer plastic top sheet. Every tool is precision-fitted, including optimized grip areas for ease of use. Each position is engraved with item numbers, text, or logos, ensuring maximum visibility, control, and accountability.

The result is a premium, long-lasting solution that significantly outperforms traditional foam inserts — built for demanding environments where quality, durability, and efficiency are non-negotiable.

# 100% SELF-SUPPLIED ENERGY

**Fosen Tools is 100% self-sufficient with self-produced renewable energy for its production of interior solutions, covering its total annual energy consumption.**

By utilizing surplus energy and feeding it back into the power grid, we also actively contribute to the local supply of clean energy. This is an important part of our commitment to sustainable and responsible operations.

Our company vehicles are electric, replacing fossil-based alternatives. Charging takes place on-site using self-produced renewable energy.

# AGENCIES / PARTNERSHIPS

Fosen Tools is a trusted wholesale supplier and partner, delivering premium products from leading manufacturers across industry, construction, maritime, defense, and aviation sectors.

Through our strategically selected partners and streamlined logistics, we deliver innovative, high-performance, and ergonomic solutions – on time, every time.

# ONLINE STORE

## EASY ACCESS

Our online store gives you easy access to up-to-date product information, pricing, and stock availability.

Explore a wide range of high-quality products developed for demanding users in industry, defense, and technical environments. You can easily browse our products, HDFI inserts, tools, and complete system solutions — all designed to provide better control, safer workflows, and improved operational efficiency.

Products are presented with clear descriptions, illustrations, and practical information, making it easy to select the right solution for your needs.

We offer fast delivery, secure payment solutions, and dedicated customer support. Whether you need a single module or fully customized system solutions, our online store gives you access to the same quality and expertise that Fosen Tools is known for.

For businesses and professional users, we also offer tailored solutions and custom orders.

The online store is both a practical tool and a showcase of our product portfolio — developed to meet today's needs and tomorrow's demands.

## WHY CUSTOMERS CHOOSE FOSEN TOOLS

- Complete, operationally efficient plug-and-play solutions
- User-adapted solutions designed for real-world needs
- Built on 5S and Lean maintenance principles
- Brand-independent flexibility
- Flexible, scalable in-house production
- Fully customized solutions tailored to customer requirements
- Driven by innovation, creativity, and continuous development
- 100% complete solutions — not partial off-the-shelf offerings
- Close to the user, with a strong focus on actual needs
- Extensive product and material expertise
- Strong access to products and materials
- Deep understanding of user requirements (industry and defense)
- High standards, premium quality, and long service life
- Fast and reliable delivery
- Pioneering – tomorrow's solutions, today!
- Your complete supplier — from A to Z

# VISJON

*"Our ambition is to set the standard as the market leader in tool solutions – perfectly tailored to both the user and the operating environment"*
