

Quality tools for aviation

Specialist catalogue

SelectorCrimp 4/8 indent crimping tool for aviation contacts

- Special crimping tool for crimping turned pin and socket contacts, primarily according to AS39029 and EN3155
- Crimp indenters, adapter ring and selector stages comply with specifications from the AS22520 aviation standard
- Use of locators according to the AS22520 aviation standard and structurally identical models easily possible
- For details, please see the 'Locators and positioning guides for aviation contacts' section
- Checking of default setting using go/no-go gauges
- Reliable crimping with forced-lock completion of crimping operation and synchronous closing of crimp indenters
- Optimised opening width, ergonomic design, reduced hand force
- Approved by the Airbus Group (AIP107-03-001)

Art. No. 8758 0000 6

Adapter ring for RENNSTEIG multi pin locators and positioners acc. to AS22520/1-01

4/8-indent crimping tool DigiCrimp® for aviation contacts

patented

- Suitable for crimping turned pin and socket contacts, primarily according to AS39029 and EN3155
- Crimp indenter geometry and adapter ring fulfil specifications from the AS22520 aviation standard
- Crimp indenter closing can be adjusted in steps of 0.01 mm and can be viewed digitally
- Multifunctional digital display, setting in mm, inches or comparable selector positions according to AS22520 aviation standard
- Checking of default setting with enclosed test gauge
- Recalibration function
- Electronic wear monitoring (patented) with warning function
- Reliable crimping with forced-lock completion of crimping operation and synchronous closing of crimp indenters
- Various setting functions accessible (remaining life, number of calibrations, serial number)
- RENNSTEIG positioning guides and/or locators can be used according to aviation standard

Crimping

Battery-powered HC 20.2 hydraulic powered crimper

- Powered hydraulic hand tool for crimping turned pin and socket contacts
- Crimping force 19 kN
- Crimp cycle 2.8 seconds
- Approx. 300 crimps achievable on one battery charge (with average load)
- Charging time <30 min for lithium-ion battery
- 4/8 indent crimping units usable, rotates by 360°
- Crimp pin closing can be adjusted in steps of 0.01 mm and can be viewed digitally (mm, inches or selector positions)
- Integrated wear monitoring
- Recalibration function
- Checking of default setting with enclosed test gauge

Crimping machine CM 25-3

- For crimping turned male and female contacts
- 4-indent units with crimping indenters fulfill requirements of MIL/SAE AS22520
- Indents adjustable in 0.01 mm increments through digital display
- Calibration by means of enclosed go-no go gauge
- Electronic wear monitoring (patented) with warning function
- Setting functions in mm, inch or positions acc. to MIL/SAE AS22520
- Compatible with numerous locators (see pages 5)

Crimping

Crimp System Tool PEW 12

- Special crimping tool for crimping virtually any recent type of crimp connector
- Guarantees exact, solder-free electrical connections
- Parallel crimping jaw closing action
- Optimum leverage
- Forced-lock completion of crimping process to ensure reliable crimping results (with emergency release)
- User-friendly with ergonomic centre of gravity
- One- and two-handed operation
- Wide range of possible combinations

Highly efficient crimping for multiple systems.

Supplied in plastic case

Art. No. 624 101 3 / 624 101 6

Basic equipment:

- Crimping tool without crimp insert or locator
- Assembly accessories

Up to seven crimp inserts and four locators can be added to the set at user request.

Crimping

Airline Service Kit

- Rugged plastic case includes: tools for cutting, stripping and crimping, insertion/removal tools, plug gauges and accessories for the maintenance and repair of aluminium cabling as used in aviation for the A380, A350 and A400M aircraft
- Special crimping tools for crimping turned pin and socket contacts (ABS1380 and ABS1381) with flexible aluminium cable, AWG 24 to 12 (ABS 0949)
- Consecutively completion of conductor and insulation crimp
- Conductor crimp is completed as a four or 4/8 indent crimp, the insulation crimp is performed simultaneously as a hex (AWG 24/18) or 12x (AWG 16/14/12) crimp

Airline Service Kit

Art. No. 8500 0001 61 / 8500 0005 61

- Tools to cut, strip and crimp, extraction and insertion tools, gauges and accessories for maintenance and repair of aircraft aluminium wiring
- Safely stored in a protective plastic case

Insulation stripper for special applications

- Special hand tool with length stop for high-quality stripping and dismantling of single and multi-wire cables ranging from 0.03 to 16 mm²
- Applicable for a great variety of insulations of differing hardness
- No pinching or deforming of cable ends, thanks to a special cutting mode
- Blades for different wire ranges, customized blade designs on request
- Automatic release after operation
- Tool with black-oxide finish and ergonomically designed 2-component grips

Art. No. 708 200 3

Position cable at length stop

Stripping with profile blades

Automatic removal of insulation

A wide range of special tools for various cable cross-sections and insulation types is available. The tools shown here are merely a representative selection of available products.

Info

Stripping

MultiStrip® 16

- Self-adjusting to cross-sections ranging from 0.08 mm² to 16 mm² without blade change
- Ergonomic design, comfortable grip distance (65 mm) and low weight
- Blade block can be replaced by hand – no other tools needed
- Low manual effort required, even at maximum capacity setting
- Non-destructive stripping with adjustable cut penetration depth
- Multi-functional, with integrated cable snips, capacity multi-stranded cable up to 16 mm² and solid up to 6 mm²
- Rugged, glass fibre-reinforced housing with two-component grip and eyelet for fall protection
- Stripping length using length stop (metric and imperial) can be adjusted precisely
- Grip can be personalised with company branding

Cable shears D15 and D20

- Easy, clean cut with one-hand operation
- No crushing or deformation of cables
- Not for steel wire, wire cable or hard-drawn copper cable

YouTube

Cable shears D15

- Cable cutter with a special cutting geometry
- Also meets aerospace specification AS6173/3
- For tin-, nickel- and silver-coated copper cables of high firmness and high strength copper alloy according to specification AS22759, to be used, also on aluminum cables
- Capacity: Ø 15 mm

Art. No. 700 016 36

Cable shears D20

- For cutting single-strand, multi-strand and fine-wire aluminum and copper cables
- Initial and final cut (1st and 2nd blades) allow cable diameter up to 20 mm respectively AWG 2/0 to be cut
- Various handle options
